of the month*

SPECTACULAR CYCLAMEN

Cyclamens add long-lasting colour and cheer to most indoor rooms

Stunning indoor colour option and oh-so-easy to care for

Position your cyclamen in bright, indirect light in the winter; While your plant is dormant during the summer, keep it out of bright light

Keep the pot in a shallow bath of water so that the plant can soak up what is needed

Cyclamens don't like heat; Don't expose them to temperatures higher than 25°C
