

*indoor plant  
of the month*

# ROSE

Lasts 3 weeks indoors or on a patio, thereafter needs to be transplanted into full sun

Water thoroughly and allow the top 2.5 cm to dry out between waterings. Keep soil barely moist in winter

Moderate to high humidity

Average room temperatures 16-24°C are best. Established plants will tolerate varying temperatures

Use good potting mix with neutral pH (pH 7)

Feed with a water soluble fertiliser specifically formulated for flowering plants
